

60 x 60 Images

February 18th

art academy of cincinnati

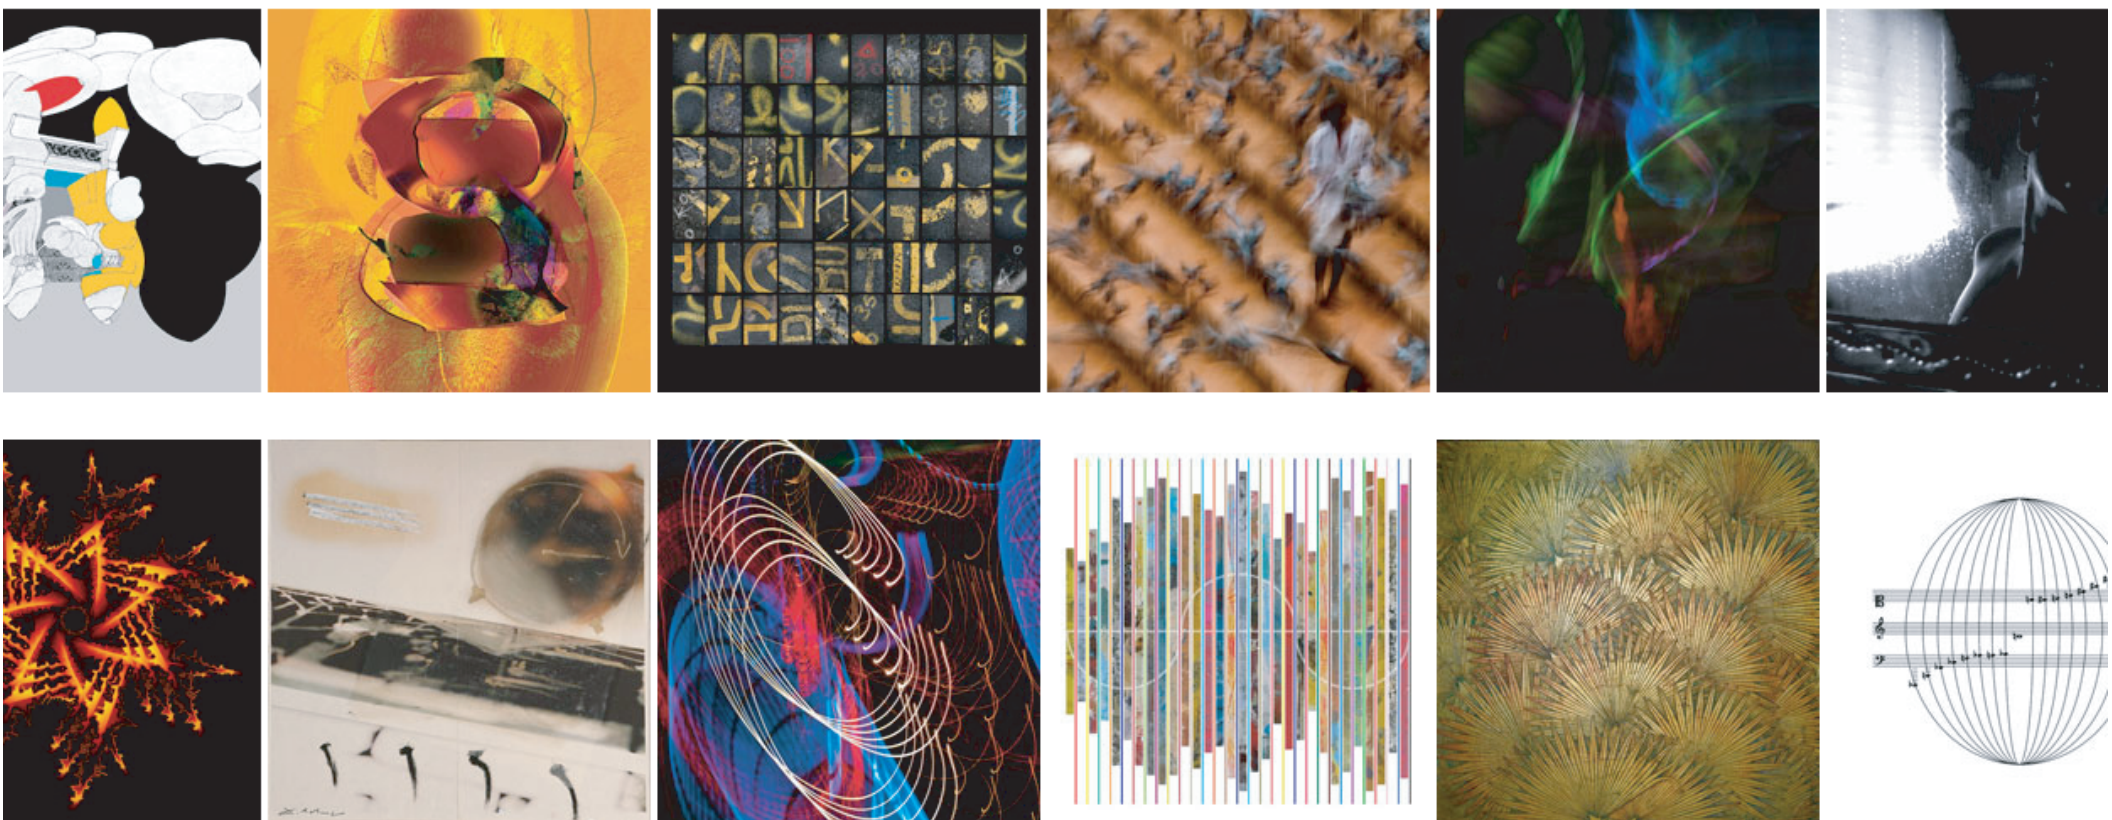

Presented in conjunction with the opening
of the 24th Annual Minumental Show

60x60 Images takes on the format of the project undertaken over many years by the American musician Robert Voisey in the field of electronic music. Voisey's project is a work in progress - he has invited 60 artists to each compose an electronic piece which lasts no more than 60 seconds in order to create a single composition which lasts 60 minutes.

60x60 Images is the counterpart for visual artists. Moving from the temporal nature of music to the metric scale, each artwork is created to measure 60x60 centimeters.

Who are the artists?

Forty were selected from a call for works which required a difficult selection to be made from 221 works coming from 26 countries around the globe. Twenty additional artists were invited to participate in 60x60 Images in part because they have already participated in the festival. In addition, they were invited because they are artists selected for their regional profiles in the contemporary art scene.

60x60 Images was created by Edition Taukay in Udine, Italy. This presentation is hosted by the Art Academy of Cincinnati and produced by Music Under Construction, in association with 60x60, its founder Rob Voisey, and Vox Novus with support from ArtsWave.
